

Hardik Agarwal

Bareilly, Uttar Pradesh

Phone Number: -

9756021146

Email Id:- hardik.ag79@gmail.com

LinkedIn: -<https://www.linkedin.com/in/hardik-agarwal-a77425305?>

Education

- Completed **Master of Computer Applications** at **Invertis University** (2024-2026)
- Completed **Bachelor of Computer Applications** in 2024 from **MJPRU**
- Completed **Class 12th** in 2021 with a score of **77%**.
- Completed **Class 10th** in 2019 with a score of **76%**.

Skills

- **Programming:** Python, C++, JavaScript, HTML/CSS
- **AI/ML Frameworks:** Pandas, NumPy, ScikitLearn
- **Tools & IDEs:** GitHub, Jupyter Notebook, Visual Studio Code
- **Visualization:** Power BI, Matplotlib
- **Database:** MySQL, MongoDB

Internship

EduSkills

April 2025 – June 2025

Web Full Stack Developer Virtual Internship

Remote

- Successfully completed a virtual internship in Web Full Stack Development through Eduskills, gaining hands-on experience in both frontend and backend technologies.
- Worked on real-world projects and learned essential tools like HTML, CSS, JavaScript, Node.js, and databases to build dynamic web applications.
- Improved problem-solving skills through coding assignments, assessments, and collaborative project work.

Projects

Weather Forecast Application

Nov 2024 – Dec 2024

FastAPI, Python

Group Project

- Developed a weather forecast application using FastAPI for building efficient and scalable APIs.
- Integrated real-time weather data using external APIs and presented it in a user-friendly format.
- Implemented asynchronous requests in Python to ensure fast and responsive performance.

Credit Card Fraud Detection System

Jan 2025 - Feb 2025

Python, Machine Learning, Pandas, Scikit-Learn

Individual Project

- Developed a machine learning model to detect fraudulent credit card transactions using real-world dataset..
- Performed data preprocessing, feature engineering, and exploratory data analysis to improve model accuracy.
- Implemented database models to manage flights, users, and reservations securely.
- Implemented classification algorithms to identify fraudulent vs legitimate transactions efficiently.
- Built a Python-based application (app.py) for real-time prediction and user interaction.

Leadership & Awards

- Presented research paper: “A review on future of mobile app development”
Conference: 4th international conference on advance computing technologies an application (ICACTA 2025) organized by Invertis University, Bareilly in collaboration with Howard University, Washington, DC, USA (April 17-18, 2025).

Certifications

- **IBM's Cognitive Classes** – SQL and Relational Database
- **Tejas Presentation Program** – Infinity Personality Development
- **IBM's Cognitive Class** – Python 101 for Data Science
- **EduSkills Remote Internship** – Web Full Stack Developer Virtual Internship
